Summary

Systems Engineer specialized in backend development and AWS cloud architecture. Experienced in designing and deploying scalable full-stack applications using serverless and microservices-based architectures. Hands-on expertise with AWS services including Lambda, DynamoDB, RDS, EC2, CloudFront, Route 53, and CI/CD automation using GitHub Actions.

Experience contributing to cloud migration and automation initiatives at IBM within Agile/Scrum environments. Proven leadership as AWS Cloud Club Captain, driving cloud adoption and technical upskilling across academic communities.

Professional Experience

Blend 360

May 2026 – Present

Software Development & Cloud

- Selected for the All Star Semillero program in Software Development, Analytics, and Cloud, oriented toward high-potential professionals.
- Applying expertise in Java, Python, and JavaScript alongside REST API Development and SQL databases within Agile/Scrum methodologies.
- Collaborating in a full-time, in-person team environment focused on continuous learning and professional growth in cloud and Backend technologies.

IBM Colombia

Feb 2025 – Dec 2025

Application Developer Intern

- Contributed to cloud migration initiatives modernizing legacy applications toward AWS-based architectures.
- Collaborated in Agile/Scrum teams delivering sprint-based backend enhancements and cloud automation tasks.
- Supported DevOps workflows, reducing manual operational processes by approximately 30%.

Technical Skills

Languages: Java, Python, Node.js, JavaScript, TypeScript

Frontend: React, Angular, Tailwind CSS, .NET

Frontend: React, Angular, Tailwind CSS, .NET

Backend & Frameworks: Spring Boot, Spring WebFlux, RESTful Services, Clean Architecture, SOLID Principles, Clean Code

Cloud: AWS (Lambda, EC2, S3, RDS, DynamoDB, CloudFront, Route 53, IAM, SNS, CloudWatch)

DevOps & Tools: Docker, Kubernetes, Git, Gradle, GitHub Actions, Azure DevOps (basic),

Artifactory, SonarQube
Testing: JUnit, Mockito, Karate, JMeter
Databases: MySQL, PostgreSQL, DynamoDB

Education

B.Sc. in Systems Engineering
Universidad EAN

2022 – 2025

Certifications

IBM Generative & Agentic AI Foundation (2025)
AWS Academy & AWS Educate (11 courses completed)

Volunteering

AWS Community Builder
Community Builder - DevTools

March 2026 – Present

- Selected as AWS Community Builder in the DevTools track, contributing to the global AWS community.
- Create and share technical content related to cloud, DevOps, and development tools.
- Participate in knowledge-sharing initiatives, collaborating with builders worldwide.

AWS Student Builder Group
Student Builder Group Leader

Apr 2025 – mayo 2026

- Led the AWS Student Builder Group at Universidad EAN, organizing 24+ technical and community events in less than one year.
- Coordinated workshops and sessions on AWS fundamentals, cloud architecture, serverless, and databases.
- Engaged over 400+ in-person attendees and 60+ virtual participants in community-driven learning initiatives.
- Collaborated with 7+ AWS Student Builder Groups across Colombia to strengthen the student cloud ecosystem.

Projects

Duitama Taxi Pricing API
github.com/sebasgao05/duitama-taxi-pricing

API Health Endpoint

REST API designed to dynamically calculate taxi fares in Duitama, Colombia, based on zones, distance, and configurable service parameters. It enables integration with external applications for real-time fare estimation.

- Technologies: Node.js, TypeScript, Express, Jest, OpenAPI (Swagger), AWS SAM, AWS Lambda, GitHub Actions

- **Technical Description:** Implements HTTP endpoints using Express with strong typing via TypeScript, automated testing with Jest, and API documentation using an OpenAPI specification (swagger.yaml). Includes CI/CD pipelines with GitHub Actions and serverless deployment using AWS SAM
- **Impact:** Automates fare calculation, reduces manual errors, and provides a scalable foundation for mobility or transportation applications.

DavidBarreraDevCom – Portfolio

github.com/sebasgao05/DavidBarreraDevCom

Personal web portfolio that showcases projects, skills, and experience as a developer, with a focus on backend, APIs, and cloud-based solutions. Designed to clearly present technical work and facilitate professional contact.

- **Technologies:** JavaScript / TypeScript, React, HTML, CSS, GitHub Actions
- **Technical Description:** Web application built using a modular, component-based architecture. Includes CI/CD pipelines implemented with GitHub Actions and cloud deployment using AWS services. Features optimized navigation and responsive design across devices.
- **Impact:** Enhances professional visibility, centralizes technical projects in a single platform, and serves as a gateway for recruiters and job opportunities.
