Professional Summary

Software Engineer with experience in backend development, full-stack development, and cloud architecture on Amazon Web Services (AWS). Experienced in designing, developing, and deploying REST and GraphQL APIs, serverless applications, microservices, and solutions integrated with SQL and NoSQL databases.

Proficient in Java, Python, JavaScript, TypeScript, Spring Boot, Spring WebFlux, Node.js, React, and AWS services including Lambda, DynamoDB, RDS, EC2, S3, AppSync, Cognito, CloudFront, and Route 53. Experienced in implementing automated testing, Clean Architecture practices, SOLID principles, and continuous integration and deployment pipelines using GitHub Actions and AWS Amplify.

Experience in application modernization, cloud migration, and process automation at IBM Colombia within Agile/Scrum teams. AWS Certified Cloud Practitioner and AWS Community Builder in the DevTools category.

Professional Experience

Blend 360

May 2026 – Present

All Star Program – Software Development, Analytics, and Cloud

- Selected for the All Star Program in Software Development, Analytics, and Cloud, designed for high-potential technology professionals.
- Developed and strengthened skills in Java, Python, and JavaScript applied to backend software and cloud-based solutions.
- Applied concepts related to REST APIs, SQL databases, data analysis, and application development.
- Collaborated within Agile/Scrum teams with a focus on continuous learning, software quality, and cloud technologies.

IBM Colombia

February 2025 – December 2025

Application Developer Intern

- Contributed to cloud migration initiatives, supporting the modernization of legacy applications toward AWS-based architectures.
- Developed backend enhancements and cloud automation tasks within Agile/Scrum teams organized through sprint-based workflows.
- Supported the implementation and optimization of DevOps workflows for software integration, validation, and delivery.
- Automated operational processes, achieving an approximate 30% reduction in manual activities.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, and CSS.

Backend and APIs: Spring Boot, Spring WebFlux, Node.js, Express, AWS AppSync, GraphQL, REST APIs, OpenAPI, Swagger, microservices, Clean Architecture, SOLID principles, and Clean Code.

Frontend: React, Angular, Vite, Tailwind CSS, shadcn/ui, and Recharts.

Cloud and AWS: AWS Amplify, AWS AppSync, Amazon Cognito, AWS Lambda, Amazon EC2, Amazon S3, Amazon RDS, Amazon DynamoDB, Amazon CloudFront, Amazon Route 53, AWS IAM, Amazon SNS, Amazon CloudWatch, and AWS SAM.

Databases: Amazon DynamoDB, Amazon RDS, SQL databases, and NoSQL databases.

DevOps and Tools: Docker, Kubernetes, Git, GitHub Actions, AWS Amplify CI/CD, Azure DevOps, Artifactory, SonarQube, Gradle, and npm.

Testing and Quality: JUnit, Mockito, Karate, JMeter, Jest, Vitest, fast-check, unit testing, integration testing, and property-based testing.

Platforms and Methodologies: .NET, Agile, Scrum, continuous integration, continuous deployment, and version control.

Technical Projects

Personal Finance – Full-Stack Serverless Application

[Production Demo or Endpoint](#)

github.com/sebasgao05/FinanzasPersonales

- Designed and developed a full-stack web application to manage transactions, accounts, cash flow, bank reconciliation, recurring payments, financial indicators, and projections.
- Implemented a serverless architecture using React, TypeScript, AWS Amplify Gen 2, AWS AppSync, GraphQL, Amazon DynamoDB, Amazon Cognito, Amazon S3, and Amazon CloudFront.
- Configured authentication, authorization, and user-level data isolation to protect financial information stored within the platform.
- Developed CRUD operations, real-time updates, and continuous deployment using AWS Amplify CI/CD.
- Implemented 337 automated tests using Vitest and fast-check, including unit tests and property-based testing to validate financial calculations and business rules.
- Replaced spreadsheet-based processes with a private, centralized, and scalable solution for financial tracking.

Technologies: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Recharts, AWS Amplify Gen 2, AWS AppSync, GraphQL, DynamoDB, Cognito, S3, CloudFront, Vitest, and fast-check.

Cloud Control Panel – EC2 Management and Automation

github.com/sebasgao05/cloud-control-panel

- Designed and developed an open-source platform for managing Amazon instances from a centralized dashboard, simplifying instance startup, shutdown, and organization.
- Implemented automated instance startup and shutdown scheduling to optimize costs in development environments and prevent unnecessary resource consumption.
- Designed a serverless AWS architecture using Lambda, API Gateway, DynamoDB, EventBridge, Amazon S3, and Amazon CloudFront.
- Added multi-account and multi-instance management capabilities, resource groups, activity history, notifications, and execution tracking.
- Structured the project as an extensible open-source solution prepared to incorporate additional AWS services and automation capabilities.

Technologies: AWS Lambda, Amazon API Gateway, Amazon DynamoDB, Amazon EventBridge, Amazon S3, Amazon CloudFront, and serverless architecture.

DavidBarreraDevCom – Professional Portfolio

david-barrera.com

github.com/sebasgao05/DavidBarreraDevCom

- Designed and developed a professional web portfolio to showcase projects, professional experience, technical skills, and services.
- Built the application using a modular architecture based on reusable components with React, JavaScript, and TypeScript.
- Implemented responsive design and optimized navigation for both mobile and desktop devices.
- Configured CI/CD pipelines using GitHub Actions and deployment to AWS cloud services.
- Centralized technical projects and contact channels into a platform designed to strengthen professional visibility.

Technologies: React, JavaScript, TypeScript, HTML, CSS, Git, GitHub Actions, and AWS.

Certifications and Additional Training

- **AWS Certified AI Practitioner** – AWS Training and Certification, August 2026.
- **AWS Certified Cloud Practitioner** – AWS Training and Certification, June 2026.

Education

B.S. in Systems Engineering

Universidad EAN, Bogotá, Colombia

2022 – 2025

Leadership and Community

AWS Community Builder

March 2026 – Present

Community Builder – DevTools

- Selected as an AWS Community Builder in the DevTools category to contribute to the global AWS community.
- Create and share technical content related to AWS, cloud computing, DevOps, and developer tools.
- Participate in knowledge-sharing initiatives and collaborate with builders from different countries.

AWS Student Builder Group – Universidad EAN

April 2025 – June 2026

Student Builder Group Leader

- Led the AWS Student Builder Group at Universidad EAN, organizing more than 24 technical and community events in less than one year.
- Coordinated workshops and sessions covering AWS fundamentals, cloud architecture, serverless technologies, and databases.
- Reached more than 400 in-person attendees and 60 virtual participants through technology training initiatives.
- Collaborated with more than seven AWS Student Builder Groups across Colombia to strengthen the student cloud computing ecosystem.
