Professional Summary

Systems Engineer with experience in backend development, full stack development, and cloud architecture using Amazon Web Services (AWS). Experienced in designing, developing, and deploying REST and GraphQL APIs, serverless applications, microservices, and solutions integrated with SQL and NoSQL databases.

Proficient in Java, Python, JavaScript, TypeScript, Spring Boot, Spring WebFlux, Node.js, React, and AWS services such as Lambda, DynamoDB, RDS, EC2, S3, AppSync, Cognito, CloudFront, and Route 53. Experienced in automated testing, Clean Architecture, SOLID principles, and continuous integration and continuous deployment pipelines using GitHub Actions and AWS Amplify.

Experience supporting application modernization, cloud migration, and process automation initiatives at IBM Colombia within Agile and Scrum teams. AWS Certified Cloud Practitioner and AWS Community Builder specializing in DevTools.

Professional Experience

Blend 360

May 2026 – Present

All Star Program – Software Development, Analytics, and Cloud

- Selected for the All Star Software Development, Analytics, and Cloud Program, designed for high-potential technology professionals.
- Developing and strengthening Java, Python, and JavaScript skills applied to backend software and cloud solutions.
- Applying concepts related to REST APIs, SQL databases, data analysis, and application development.
- Collaborating with technical teams under Agile and Scrum methodologies, with a focus on continuous learning, software quality, and cloud technologies.

IBM Colombia

February 2025 – December 2025

Application Developer Intern

- Contributed to cloud migration initiatives by supporting the modernization of legacy applications into AWS-based architectures.
- Developed backend enhancements and cloud automation tasks within Agile and Scrum teams, delivering work through sprint-based cycles.
- Supported the implementation and optimization of DevOps workflows for software integration, validation, and delivery.
- Automated operational processes, reducing manual activities by approximately 30%.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, and CSS.

Backend and APIs: Spring Boot, Spring WebFlux, Node.js, Express, AWS AppSync, GraphQL, REST APIs, OpenAPI, Swagger, microservices, Clean Architecture, SOLID principles, and Clean Code.

Frontend: React, Angular, Vite, Tailwind CSS, shadcn/ui, and Recharts.

Cloud and AWS: AWS Amplify, AWS AppSync, Amazon Cognito, AWS Lambda, Amazon EC2, Amazon S3, Amazon RDS, Amazon DynamoDB, Amazon CloudFront, Amazon Route 53, AWS IAM, Amazon SNS, Amazon CloudWatch, and AWS SAM.

Databases: Amazon DynamoDB, Amazon RDS, SQL databases, and NoSQL databases.

DevOps and Tools: Docker, Kubernetes, Git, GitHub Actions, AWS Amplify CI/CD, Azure DevOps, Artifactory, SonarQube, Gradle, and npm.

Testing and Quality Assurance: JUnit, Mockito, Karate, JMeter, Jest, Vitest, fast-check, unit testing, integration testing, and property-based testing.

Platforms and Methodologies: .NET, Agile, Scrum, continuous integration, continuous deployment, and version control.

Technical Projects

Personal Finance – Full Stack Serverless Application

[Production Endpoint](#)

github.com/sebasgao05/FinanzasPersonales

- Designed and developed a full stack web application for managing transactions, accounts, cash flow, bank reconciliation, recurring payments, financial indicators, and financial projections.
- Implemented a serverless architecture using React, TypeScript, AWS Amplify Gen 2, AWS AppSync, GraphQL, Amazon DynamoDB, Amazon Cognito, Amazon S3, and Amazon CloudFront.
- Configured authentication, authorization, and user-level data isolation to protect financial information stored on the platform.
- Developed CRUD operations, real-time updates, and continuous deployment workflows using AWS Amplify CI/CD.
- Implemented 337 automated tests using Vitest and fast-check, including unit tests and property-based tests for financial calculations and business rules.
- Replaced spreadsheet-based processes with a private, centralized, and scalable financial management solution.

Technologies: React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Recharts, AWS Amplify Gen 2, AWS AppSync, GraphQL, DynamoDB, Cognito, S3, CloudFront, Vitest, and fast-check.

Duitama Taxi Pricing API

[API Health Endpoint](#)

github.com/sebasgao05/duitama-taxi-pricing

- Designed and developed a REST API to calculate taxi fares in Duitama, Colombia, based on service zones, distance, and configurable pricing parameters.
- Implemented HTTP endpoints using Node.js, TypeScript, and Express, applying strong typing and a modular application structure.
- Documented the API using the OpenAPI specification and Swagger to facilitate integration with external applications.
- Implemented automated tests using Jest to validate endpoints, fare calculations, and business rules.
- Configured CI/CD pipelines using GitHub Actions and serverless deployment to AWS Lambda through AWS SAM.
- Automated fare calculations and provided a scalable foundation for transportation and mobility applications.

Technologies: Node.js, TypeScript, Express, Jest, OpenAPI, Swagger, AWS SAM, AWS Lambda, and GitHub Actions.

DavidBarreraDevCom – Professional Portfolio

david-barrera.com

github.com/sebasgao05/DavidBarreraDevCom

- Designed and developed a professional portfolio website to showcase projects, technical experience, skills, and professional services.
- Built the application using a modular architecture based on reusable components with React, JavaScript, and TypeScript.
- Implemented responsive design and optimized navigation for desktop and mobile devices.
- Configured CI/CD pipelines using GitHub Actions and deployed the application using AWS cloud services.
- Centralized technical projects and contact channels in a platform designed to improve professional

visibility.

Technologies: React, JavaScript, TypeScript, HTML, CSS, Git, GitHub Actions, and AWS.

Certifications and Additional Training

- **AWS Certified Cloud Practitioner** – AWS Training and Certification, June 2026.
- **IBM Generative & Agentic AI Foundation** – IBM, 2025.
- **AWS Academy and AWS Educate** – 11 completed courses.

Education

Bachelor's Degree in Systems Engineering

Universidad EAN, Bogotá, Colombia

2022 – 2025

Leadership and Community Involvement

AWS Community Builder

March 2026 – Present

Community Builder – DevTools

- Selected as an AWS Community Builder in the DevTools track, contributing to the global AWS technical community.
- Create and share technical content related to AWS, cloud computing, DevOps, and software development tools.
- Participate in knowledge-sharing initiatives and collaborate with AWS builders from different countries.

AWS Student Builder Group – Universidad EAN

April 2025 – June 2026

Student Builder Group Leader

- Led the AWS Student Builder Group at Universidad EAN, organizing more than 24 technical and community events in less than one year.
- Coordinated workshops and technical sessions covering AWS fundamentals, cloud architecture, serverless computing, and databases.
- Reached more than 400 in-person attendees and 60 virtual participants through technology education initiatives.
- Collaborated with more than seven AWS Student Builder Groups across Colombia to strengthen the student cloud computing ecosystem.
